PERSONAL PROFILE:

I have around 22 years of experience in Broadcast Television. I am now a freelance DOP but my previous full-time job I was working as a camera operator for a UK shopping Channel providing 16 hours of live television a day. I was promoted to Camera shift leader responsible for a team of four operators covering all aspects of the channel's production. I was responsible for the organisation of the day's camera requirements and ensuring the highest quality possible in the channel's output.

I am a calm, self-motivated person with good communication skills and a commitment to self-improvement. My experience includes working with many different makes of cameras in a diversity of demanding live and recorded situations, both as part of a team on multiple camera shoots to PSC & outside broadcasts.

In the studio, I am an equally skilled handheld & ped camera operator.

As a DOP I have filmed for many Promos, Commercials, Interviews & TV Shows.

I have experience with most makes of broadcast cameras including Digital Film Formats.

I enjoy my work immensely and bring my skills, energy & enthusiasm to every job I do.

I also run my own small production company producing broadcast and corporate content for clients.
