With over 20 years' experience working within the industry, I pride myself on producing dynamic creative visuals that will enhance any production. My award-winning documentary work has taken me all around the globe, often filming in challenging extreme environments accumulating in filming hours of primetime content for the major networks. I have expert knowledge of current high-end camera systems including the Sony Venice, FX9 and the Arri Alexa / Amira. In addition, I hold a UK CAA GVC drone licence and qualified to fly the drone in the USA with a FAA Part 107 licence.

Chernobyl Power Station | Pripyat
